Save Our Planet Save Animals Save Children

- ✓ We need to try harder to keep our planet healthy and clean
- ✓ Everybody can help if they stop using cars so much
- ✓ We should compost and recycle more
- ✓ We should replace dirty fossil fuels with solar and wind
- ✓ We should consume wisely and stop wasting
- ✓ We should protect animals' habitats
- ✓ We should reduce the amount of gasoline that goes up into the atmosphere by carpooling when driving to work or school, using public transportation more often, biking or walking more, or using electric cars, using energy efficient devices
- ✓ Usually it is supposed to be very cold during the Winter, but of all of that gasoline going up into the atmosphere, is creating a CO2 blanket around the Earth, causing global warming and climate change resultant with natural disasters and wild forest fires
- ✓ Most of the litter that is around our planet is plastic and food. By composting and recycling, people can reduce the amount trash taking over all of the oceans and forests
- ✓ We should also invent more biodegradable items which would melt into the Earth instead of polluting our planet and our bodies
- ✓ Pollution causes cancer and kills many people and children around the world
- ✓ People should organize to change the system and stop pollution and destruction of our planet and future of next generations

 **Earth Day!**  

SAVE the Earth?

Reuse

Provides an excellent, environmentally preferred alternative to other waste management methods, because it reduces air, water and land pollution, limits the need for new natural resources, such as timber, petroleum, fibers, and other materials.

Make sure to reuse:

- Glass Jars
- Cans
- Gallon Jugs
- Plastic Soda Bottles
- Newspapers
- Magazines
- Paper Bags
- clothes Towels
- Bedding
- Seeds
- Laundry waste
- Plastic Bags

~~NO MORE~~

Reduce

Make smaller or just in a more durable size.

Helps the environment by decreasing power plant emissions.

Make sure to:

- Get to know the rules of recycling
- Ditch the plastic bags
- start composting
- Stop using disposable plates

Recycle FLOW

Helps protect the environment, reduces the need for mining, quarrying and logging.

Recycling saves energy and also reduces greenhouse gas emissions.

Make sure to recycle:

- Glass
- Paper
- Card board
- Metal
- Plastic
- Tires
- Textiles
- Batteries
- Electronics
- Garden waste
