

# NIH MINDFUL PRINTING CAMPAIGN 2015

Thank you for using a  
network printer!

NIH has approximately 12,000 network printers, and a staggering 14,000 individual printers. The cost to print per page is approximately 30x cheaper with a network printer than an individual printer!

By the way, we've printed this  
**one** page in the hope that you will  
save many more!

NIH recycled 660 tons of paper in 2014, the equivalent of 16,500 sheets of paper per employee, but you can help reduce these massive numbers:

- Print less, double-sided, or not at all
- Go electronic—email, scan, sign electronically
- Reuse paper, envelopes, and file folders
