

2021 HHS Kids' Earth Day Poster Contest – NIH Winners

The HHS Kids' Earth Day Poster Contest has been an annual tradition at the NIH for many years. Each year, we receive dozens of creative submissions from the children of NIH Staff. The artwork has always been truly impressive and demonstrates great knowledge of the environment! The 2021 contest used the theme "Save Energy, Save the Earth." Each of the submissions were divided into four groups based on grade: K-2, 3-5, 6-8, and 9-12. The posters were graded, and a winner was determined for each category, which is shown below. These winners will be submitted to HHS to compete with the other OPDIVs for the overall HHS contest (winners will be announced on Earth Day). Thank you to everyone who submitted a poster ([all NIH entries can be viewed here](#)) and congratulations to the NIH winners!

Grades K-2 Winner: Skye Payaggapandha

Grades 3-5 Winner: Audrey Porter
